

# From Database to Page

## Step 1: Turn Your Design into HTML

Paste in a screen shot of your final event page.

## Step 2: Strip The Content out of Your Design

---

## Step 3: Turn Your Design into a Template

### Queries

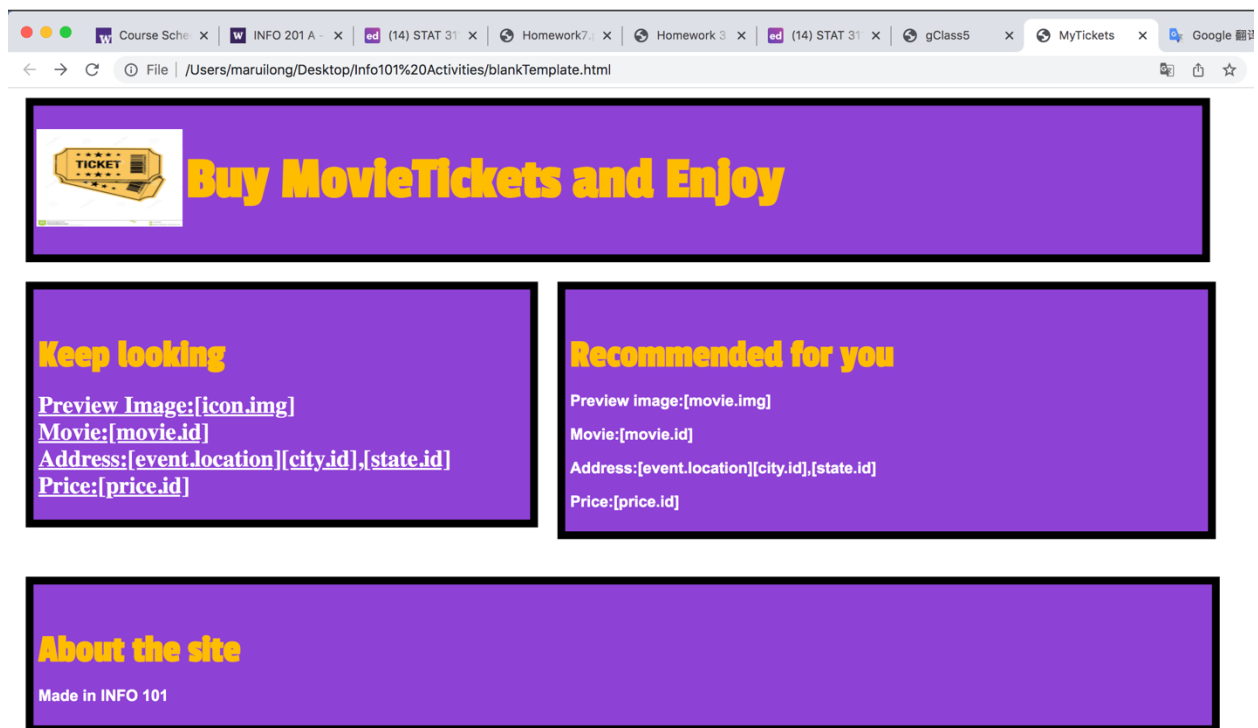

Paste in the two queries you will need to get event information out of the database.

```
SELECT movie.img FROM event.info WHERE eventid= movieid
```

```
SELECT city.id FROM even.info WHERE locationid= city.id
```

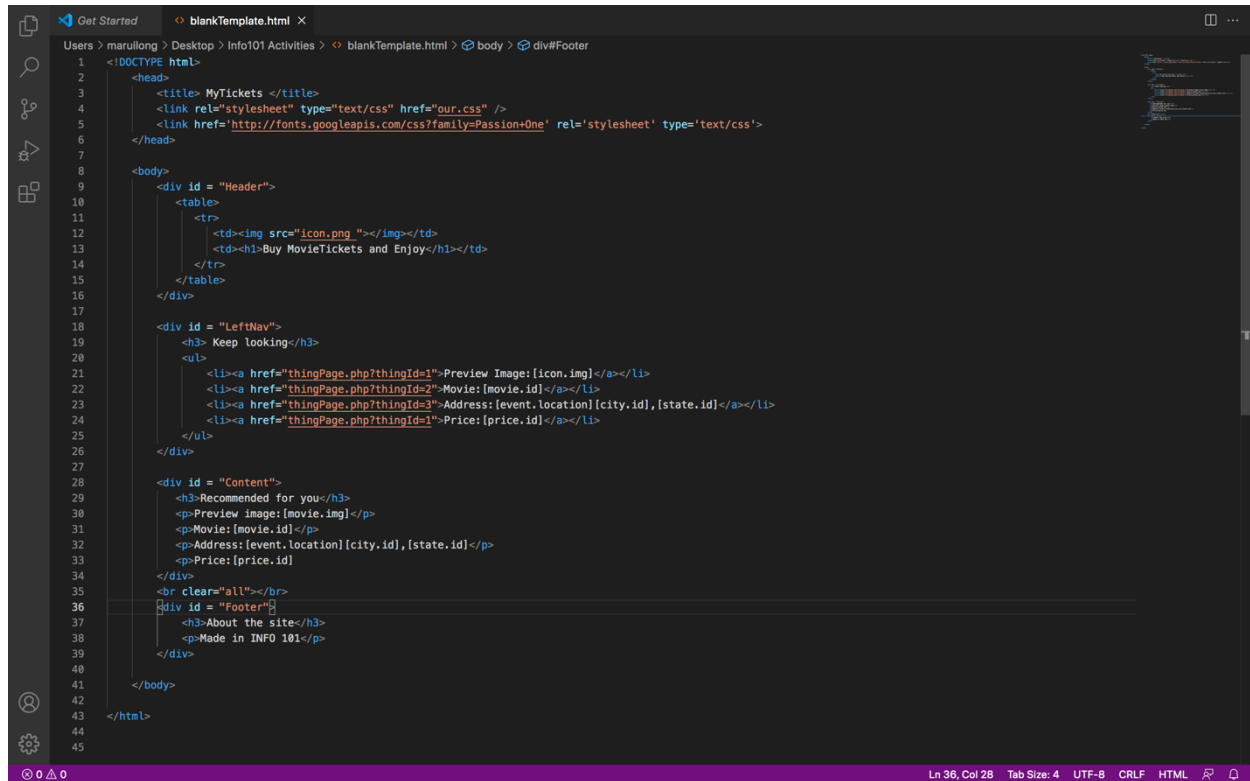

The event area template in the Browser

Paste in a screen shot of your completed HTML template as it shows up in a browser

## The event navigation template as HTML

Paste in a screen shot of the HTML behind your template.

```
1 <!DOCTYPE html>
